SMART PFT USB – PC BASED SPIROMETER

Make: Medical Equipment Europe GmbH -Germany

Features

- Spirometer Using most precise and accurate variable Orifice Pneumatic sensor
- Smart Soft PC software with free of license
- Spirometry Tests Available: Slow vital capacity /Forced Vital Capacity PRE-POST and MVV
- More than 40 spirometry parameters
- GLI 2012 predicted values along with many other predicted sources.
- Pre/Post comparison and reporting in same page
- Spirometer with Incentive graph for kids
- Customizable reports
- Auto report save feature
- Software written instruction for technician support
- Manual and automatic spirometry test interpretation
- Manual or automatic calibration entry

A high-performance PC Based spirometer with high-precision technology and a wide variety of test options including SVC, FVC, Pre-Post MVV Tests

SMART PFT USB BT- WIRELESS BT PC BASED SPIROMETER

Make: Medical Equipment Europe GmbH -Germany

medical[®]
equipment
europe

Features

- Spirometer Using latest Bluetooth 4.1 connection for wireless operation
- with battery backup option
- Spirometer Using most precise and accurate variable Orifice Pneumatic sensor
- Smart Soft PC software with free of license
- Spirometry Tests Available: Slow vital capacity /Forced Vital Capacity PRE-POST and MVV
- More than 40 spirometry parameters
- Spirometer with Incentive graph for kids
- Customizable reports
- Auto report save feature
- Software written instruction for technician support
- Manual and automatic spirometry test interpretation
- Manual or automatic calibration

A high-performance Wireless spirometer with high-precision technology and a wide variety of test options with BTLE Bluetooth

SMART PFT CO TRANSFER – CO DIFFUSION SYSTEM

Make: Medical Equipment Europe GmbH -Germany

Designed for simplified CO transfer capacity screening

Features

- Single breath CO Diffusion System
- CO transfer capacity test fast, linear, and reproducible
- Quick screening of CO-Diffusion capacity
- Advanced and long-term tested software algorithms help calculate measurements with very small vital capacity from 0.7 litres
- Displays data like gas concentrations, volume and mouth pressure
- Runs fully automatic without any technician
- Selective and fast infrared gas analyzer measuring transfer and inert gas (CO & CH₄)
- Particular and precise gas supply by a demand valve
- Input mask for Hb and COHb values and correlating recalculation of test result
- Automatic altitude corrections by built in ambient pressure sensor

SMART PFT NEBULIZER BRONCHICAL PROVOCATION SYSTEM

Make: Medical Equipment Europe GmbH -Germany

Features

- Built-in, low noise air compressors
- Integrated LCD
- Breathe in and out without contamination risk
- No need for an external source of compressed air, a low noise compressor is built in.
- A comfortable, safe, and very robust device to support challenge testing.
- Complete controlled workflow up to 20 stages
- Three-way valve to control the airflow.
- The compressor runs fully automatic.
- LCD-display guarantees a very simple control handling
- A flow-based trigger sensor synchronizes the start of nebulization with beginning of inhalation
- Automated execution protocols can be programmed to simplify routine testing

Standardized dosimeter unit for challenge testing

SMART PFT LAB BODY PLETHYSMOGRAPHY SYSTEM

Make: Medical Equipment Europe - Germany

medical[®]
equipment
europe

Solid aluminium & plastic construction combined with modern design & functionality. Very modern and long-term stable materials make it a very useful and unique device.

Features

- Helps to avoid claustrophobic problems
- Continuous BTPS data sampling and calculation
- Designed for patients with poor mobility
- Large 2 door opening makes placing the patient very comfortable
- Very efficient ambient pressure movement compensation unit
- Height adjustable, comfortable chair
- Double door design with oval shape with full surrounding few helps to avoid claustrophobic problems
- 3D adjustable device stand. (optionally, e-motor driven)
- Ambient pressure, temperature and humidity sensors allow continuous BTPS data sampling and calculation
- The electromagnetic door locking is maintenance free and safe for patients
- The box has a very efficient ambient pressure movement compensation unit

SPIROLAB – DESKTOP SPIROMETER

Make: Medical International Research -Italy

Desktop, Stand-alone and PC-based Spirometer, with optional Oximetry

Features

- 7-inch Touchscreen, all-in-one Spirometer with embedded printer and Optional Oximetry
- Real-time test also available on PC, via USB and Bluetooth
- Lightweight for easy mobility, carrying case included, long life Rechargeable Battery
- GLI predicted sets available in Stand-Alone mode and PC mode
- Paediatric Incentive available on display,
- PC CONNECTION- real time test on PC screen, connect with your EHR/EMR, back-up internal memory, connectivity via USB and Bluetooth
- EHR CONNECTIVITY-Via PC, integration with patient database on your EHR/EMR (in HL7, GDT)-optional
- CALIBRATION SOFTWARE EMBEDDED-Available on device, with printable calibration report (no separate software required)
- PRINTER EMBEDDED- Thermal printer. Paper size 112mm. Direct external print also available via PC software

SPIRODOC – HANDHELD SPIROMETER & 6 MINUTES WALK TEST

Make: Medical International Research -Italy

Features

- Touchscreen Spirometer and 3D Oximeter: 6MWT, Sleep Test, 24h SpO2 Holter
- Wireless Real-Time Test also available on PC, via Bluetooth and USB
- Lightweight and easy to carry on-the-go, with long-life Rechargeable Battery
- REAL-TIME TEST- Spirometry: FVC, VC, MVV, PRE/POST Bronchodilator comparison ,3D Oximetry (optional): Spot test (SpO2, Pulse), 6MWT, Sleep Test, 24h SpO2 Holter Test
- CARRY EVERYWHERE-LCD Touchscreen Display, long battery life, large internal storage
- PC CONNECTION-Real-Time Test on PC screen, EHR/EMR integration, internal memory back-up and more
- EHR CONNECTIVITY-Via PC, integration with patient database on your EHR/EMR (in HL7, GDT)
- 6 MINUTES WALK TEST-6MWT is available with the Oximetry Option: measure the response of a cardiopulmonary system involved in exercise

Portable Touchscreen Spirometer with 3D Oximetry option

SPIROBANK II - HANDHELD SPIROMETER

Make: Medical International Research -Italy

Features

- It can be used in Stand Alone mode and with PC via Bluetooth and USB
- Pediatric incentive animations available on your PC screen to support patient compliance during a spirometry test
- Traffic light system for immediate test interpretation
- SpO2 and pulse rate can be viewed directly on the display, including the plethysmography curve
- REAL-TIME TEST-Spirometry: FVC, VC, IVC, MVV, PRE-POST Bronchodilator comparison Oximetry (optional): Spot test (SpO2, BPM)
- CARRY EVERYWHERE- HR Display, long battery life, large internal storage, carrying case included
- PC CONNECTION- Real time test on PC screen, connect with your EHR/EMR, back-up internal memory, and much more
- COMPLIANCE WITH ATS/ERS 2019

Portable Touchscreen Spirometer with Oximetry option - USB and Bluetooth connection

MINISPIR – PC BASED SPIROMETER

Make: Medical International Research -Italy

Features

- REAL-TIME TEST-Spirometry: FVC, VC, MVV, PRE/POST Bronchodilator comparison
- PLUG AND PLAY-Power via USB, no internal memory, no display, no maintenance
- PC CONNECTION-Real time test on PC screen, connect with your EHR/EMR, back-up database on PC memory and much more
- COMPLIANCE WITH ATS/ERS 2019 And other Standards including ISO 26782 (for Spirometry), ISO 23747 (for PEF), and more
- PREDICTED SETS AND PREDICTED VALUES-Large Selection of Predicted Sets (including GLI) and Predicted Values (including comparison %Pred, Z-score and LLN) in PC-mode
- EHR CONNECTIVITY-Via PC, integration with patient database on your EHR/EMR (in HL7, GDT)
- Light weight and easy to carry
- Comes with Disposable turbines for complete infection control
- Comes with PC software for connectivity

Portable spirometer with connection to electronic medical records and accurate readings.

NOBREATH FENO MONITOR

Make: Bedfont Scientific Ltd-UK

The NObreath® is a FeNO monitor which can be used to measure airway inflammation for the management and diagnosis of asthma.

Features

- Non-invasive, quick, and easy to perform
- REVOLUTIONARY INTERFACE-Full-colour touch screen with easy-to-use interfacing and onscreen motivational
- Exhalation guides
- ADULT AND CHILD PROFILES-Adult & child patient profiles for best sampling times and quick result referral
- Components, saving time and money
- PROVEN TECHNOLOGY-The NObreath has over 10 years of clinical use featuring in many studies worldwide
- ERGONOMIC DESIGN-An ergonomic design, fully portable and incorporated with SteriTouch® technology for optimum infection control
- NOBREATH DOCK-NObreath dock for safe and convenient storage, charging and synchronization
- NO LIMITS-Subject to correct use, maintenance, and service
- Comes with free FENOChart PC software with online test connectivity and for patient data base

Features

- User-friendly interface for easy %FCOHb conversion.
- Stores patient details with a large touchscreen.
- SteriTouch® technology enhances infection control.
- Green, amber, and red traffic light system for CO levels.
- Ambient CO monitoring for added safety.
- D-piece™ filters out 99% of airborne bacteria.
- SteriBreath™ mouthpieces for cost-effective infection control.
- PC interactive with COdata+™ software included
- Instant results in ppm, %COHb, and %FCOHb.
- Analyzes carboxyhaemoglobin and CO ppm levels
- Automatic calibration and D-piece™ renewal reminders
- Adult and adolescent profiles for smoking cessation motivation.
- Testing modes for adults, adolescents, and pregnant women

SMOKERLYZER CO BREATH MONITOR

Make: Bedfont Scientific Ltd-UK

With a brand new easy to use interface, SteriTouch® technology and the motivational traffic light system, the Smokerlyzer® breath CO monitor is ideal for all stop smoking services.

PSG 1100 – FULL FLEDGED SLEEP LAB SYSTEM WITH BUILT-IN CO2 MONITORING

Make: Nihon Kohden -Japan

Features

- 100 M Ω input impedance
- IP addressable
- 25 EEG (full 10-20 montage)
- Dedicated body position, EOG (2), ECG (3 with reference) and Chin EMG (3)
- 8 bipolar pair inputs
- Internal SpO2
- Internal mainstream EtCO2
- Internal data storage
- Built-in power isolation
- 6 DC inputs (expandable to 14 DC channels)

The PSG-1100™ is designed with enhanced features with the quality and reliability you have come to expect from Nihon Kohden. Fullfledged Sleeplab PSG system with more than 50 Channels.

SPHINX II – FULL FLEDGED SLEEP LAB WITH INTERCOM

Make: Neurotronics -USA – A Nihon Kohden Company

Features

- Full Fledged Sleep lab PSG System with more than 30 channels.
- Built-in pressure transducer
- Quick disconnect
- IP Addressable
- VESA wall-mount
- Full AASM channel set
- Built-in intercom/microphone
- Nihon Kohden SpO2
- 6 DC inputs (expandable to 14 DC channels)

The Sphinx PMU710 is the latest addition to the Nihon Kohden family of amplifiers. Full Fledged Sleep lab PSG System with more than 30 channels.

MEDIBYTE JUNIOR-PORTABLE TYPE 3 SLEEP LAB

Make: BRAEBON Medical Corporation - Canada

Miniature 7-parameter Home Sleep Tester that records up to two nights on a single battery.

BRAEBON

Features

- MediByte® Junior is a Type 3 Recorder-Using patent pending technology
- Simple, cost effective and reliable screening for sleep apnea
- Weighing just 91 grams, it is ideal for both adult and paediatric studies
- CPAP compatible
- PC connectivity via USB
- Type 3. The MediByte® Jr. software is easy to use, yet flexible enough to analyze a number of user selected signals

BRAEBON

Features

- Weighing just 93 grams, it is ideal for both adult and pediatric studies
- Ease of Use Simplified Interpretation: Clear, concise, and user-friendly design.
- Patent-Pending MediByte®: Exceeds home evaluation guidelines for snoring and sleep apnea.
- Snoring Audio Playback: Allows playback of recorded snoring sounds.
- CPAP Compatibility: Easily connects to any CPAP device with a standard luer connector.
- 24-Hour EKG: Provides continuous EKG monitoring.
- 2-Night Studies: Supports two-night sleep studies.
- Accurate Body Position Tracking: 3-axis accelerometer for precise body position data.
- Easy Event Markers: Oversized tactile push-button for effortless event marking during recording.

MEDIBYTE – PORTABLE SLEEP LAB TYPE 2/3 SLEEP RECORDER

Make: BRAEBON Medical Corporation - Canada

15 channel Type 2 HST Recorder or Type 3 HSAT Recorder. Complete with sensors and software, the MediByte® package includes everything you need to provide reliable patient testing in a variety of configurations

METAMAX 3B – MOBILE VO2 MAX - CPET SYSTEM

Make: Cortex Biophysik GmbH-Germany

Features

- portable Breath-by-Breath system
- internal battery allowing a 12-hour running time (available as an option)
- Bluetooth® LE for connection to HF, SpO2, power meters and other measuring devices
- interfaces to numerous types of ECGs
- USB or Bluetooth® connection to a PC
- front display with LED status indicators
- push-pull connectors protecting against reverse polarity and damages.
- minimal need for maintenance
- long calibration intervals
- O2 sensor with long lifespan
- constant and dynamic flow control
- modular future-proof system set-up

The METALYZER® 3B is a portable high resolution spiroergometry system with Breath-by-Breath technology.

METALYZER 3B – PORTABLE VO2 MAX CPET SYSTEM

Make: Cortex Biophysik GmbH-Germany

Features

- xExtremely light, mobile breath-by-breath system (580 g)
- Telemetry range of over 1,000 m (bi-directional telemetry with Bluetooth® technology)
- With chest and back carrying system
- Convenient control by Smart Control, laptop or as a standalone
- 6 hours of battery life
- 400 hours of data storage
- Constant, dynamic flow control
- Freely definable audio signals

The MetaMax® 3B is a spiroergometry system for professional outdoor use designed to meet your individual needs no matter how exceptional they might be.

PULMOSCAN - FOT DEVICE

Make : Cognita Labs - USA

A non-invasive and well-researched technique, FOT measures respiratory impedance/mechanics by superimposing gentle oscillations over tidal breathing within a minute

Features

- Tidal Breathing- No forced expiration
- Portable, stand-alone, and wireless Forced Oscillation Technique
- (FOT) device
- FAST, ACCURATE, LOW-COST
- SIMPLE OSCILLOMETRY METHOD
- Safe – Low-frequency sound waves, shown safe for children as young as 4 years old.
- Accurate – (FOT)PulmoScan Brings Pulmonary Testing Closer to Patients

THORASYS

TREMOFLOW – FOT DEVICE

Make: Thorasys Canada

Features

- Tidal Breathing- No forced expiration
- Info related to small airways
- Fast & Easy-Test in a few minutes
- Adult & Pediatric-Normative values provided
- Intra-Breath Analysis-Pattern & Time-Course
- Easy Daily Calibration-Less than 30sec
- Compact & Portable-Weighs only 700 g
- Pre/Post Testing-Automated Workflows

The tremoflo® Airwave Oscillometry System (AOS) has revolutionized the Forced Oscillation Technique (FOT) by using a vibrating mesh to superimpose a gentle oscillatory pressure and flow wave

Features

- KH-Series automatically adapts to the patients personal training requirements
- Manual Training Intensity from 5 to 200cm H₂O
- Allows up to 150 breaths training stimulus to the respiratory / inspiratory muscles
- Provides detailed breathing training feedback including Load (cmH₂O), Power (Watts) and Inhaled Volume (Litres)
- Testing of MIP, PIF and s-index

POWERBREATHE KH2

Make: POWERbreathe - UK

SHAKER DELUXE

Make: POWERbreathe - UK

Features

- The Shaker Deluxe by POWERbreathe is a mucus clearance device
- Ergonomic and simple to use, requiring no assembly
- Clears the airways to reduce the chances of developing lung infections and damage
- Improves lung function, reduces breathlessness and fatigue
- Pressure starting from 8cmH₂O to 11cmH₂O
- Suitable for adults and children

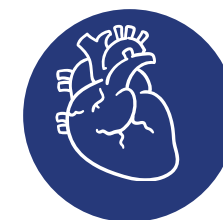

Features

- POWERbreathe Medic Plus offers the lowest entry-level load of any threshold IMT device
- Suitable for those with very weak breathing muscles
- Improves breathing strength and stamina
- Drug-free
- Recommended by medical professionals
- Ergonomic design
- Train for 30 breaths, twice a day for results

POWERBREATHE MEDIC PLUS

Make: POWERbreathe - UK

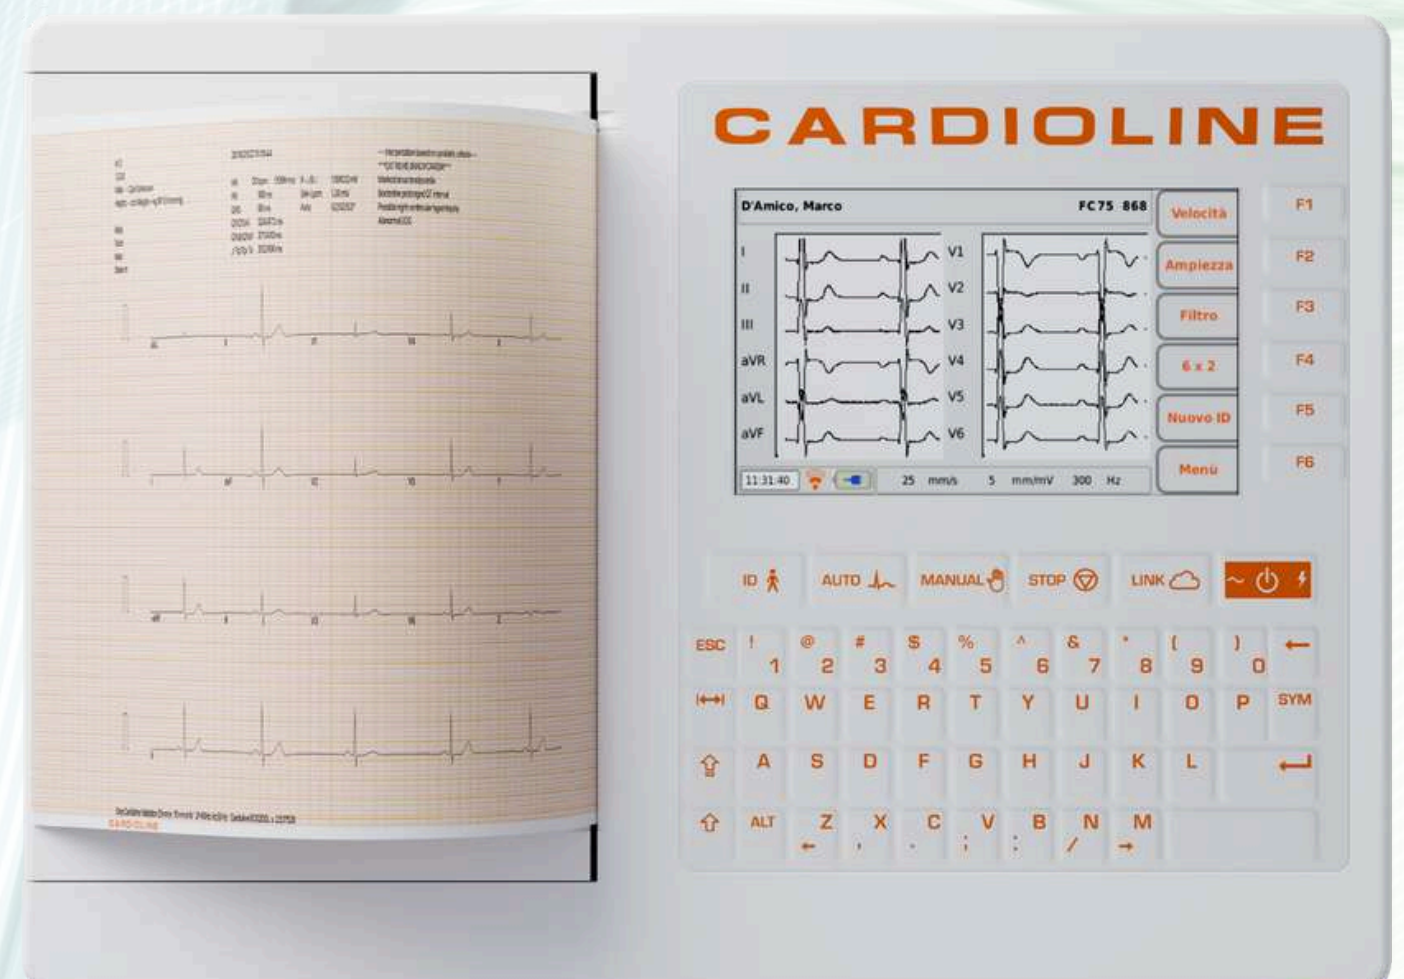

CARDIOLINE

RESTING ECG RESTING ECG ECG200+ Make : Cardioline - ITALY

Features

- Full Format 12 Lead ECG: Optimizes hospital ECG workflow.
- Quick ECG Acquisition: Fast and easy operation.
- Highly Accurate Measurements: Exceeds stringent standards and international recommendations.
- Smart User Interface: Simplifies the ECG process.
- Seamless Data Integration: Enhances operational efficiency.
- Optional GDPR Module: Ensures complete protection of sensitive data with strong authentication.

The full format 12 lead Electrocardiograph designed for your Hospital, offering quick ECG acquisition with highly accurate measurements that exceed stringent standards.

STRESS EXERCISE TEST CUBESTRESS SYSTEM Make : Cardioline - ITALY

CARDIOLINE

Features

- Innovative and configurable interface
- 12/15-lead HD+ USB and Bluetooth (BLE) ECG acquisition
- Dedicated all-in-one touchscreen PC
- Purpose-built trolley for integrated/external printers
- Optional external NIBP/SPO2 devices and electrode suction systems
- Compatible with Cardioline's ECGWebApp platform for customizable data workflow
- Intuitive graphical user interface for display customization

Incorporating the latest innovations for streamlined stress exercise testing with a highly configurable interface and integrated test procedures.

HOLTER MONITORING WALK FREE

Make : Cardioline - ITALY

CARDIOLINE

Features

- Cable-Free Solution: No cumbersome wires, just a sleek patch design.
- Extended Recording: Up to 9 days on a single battery.
- High Sampling Rate: 250 samples/second for precise data.
- Lightweight and Comfortable: Only 30g for enhanced patient comfort.
- Simple Application: Uses 3 standard electrodes placed on the chest.
- Real-Time Signal Check: Via Cardioline's Device Web Manager software.

The ultimate cable-free, 3-channel "patch" ECG Holter recorder offering up to 9 days of monitoring with maximum comfort and freedom.

CARDIOLINE

Features

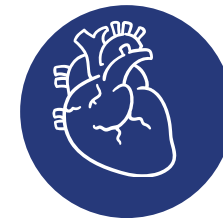

- 24+ hours of continuous monitoring
- Oscillometric method for accurate readings
- Auto-feedback adjustment for patient comfort
- Bluetooth and USB connectivity for easy data transfer
- Compatible with PC for test preparation and data downloading

ABPM SYSTEM WALK200B

Make : Cardioline - ITALY

The Walk200b is an ambulatory blood pressure monitor that uses the oscillometric method for 24+ hours of tracking with auto-feedback cuff adjustment for comfort.

RESTING/STRESS ECG CUSTO CARDIO 300

Make : custo med GmbH - Germany

Features

- Custo cardio 300 is our 12-channel resting and stress ECG for mobile and flexible use
- Automatic 10-second ECG
- Countdown can be visualised
- Check of electrode quality at a glance
- Start/Stop button on the device and on the PC
- Available as USB and BT version
- Maximum flexibility due to exchangeable patient cables and workstations
- Approx. 10 hours battery runtime
- Mobile use on all PCs (USB, BT/WiFi)
- Complete remote control is possible
- Easy and fast disinfection

Custo cardio 300 is our 12-channel resting and stress ECG for mobile and flexible use

RESTING/STRESS ECG CUSTO CARDIO 400

Make : custo med GmbH - Germany

Features

- Hygiene certificate of the German Society for Hospital Hygiene
- Suction capacity in six steps (0 – 280 mbar)
- Perfect data transfer via USB and BT
- Coloured view of the different modes
- Reusable electrodes
- Gentle application due to adapted suction pressure
- Electrodes and suction lines can be easily exchanged
- Cleaning of suction lines by automatic blowing after each examination

Custo cardio 400 is our resting and stress ECG with suction system in one device

HOLTER ECG CUSTO GUARD HOLTER

Make : custo med GmbH - Germany

Custo guard holter is the new Holter ECG recorder that combines the benefits of both long-standing experience and continuous development.

Features

- 3 channels with two independent leads
- Completely wireless and perfect for hygienic application
- Optimum recording quality with the new custo wing electrode
- Fast and stable device communication and data transfer
- Short battery charge times
- Pacemaker detection
- Position and motion detection
- Check for correct application through PC monitoring
- Bluetooth Low Energy for mobile applications
- LED status display for charge status and HR detection

Features

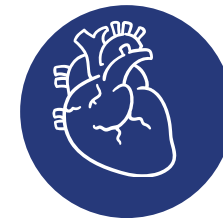

- Automatic day-night-recognition, faster inflating and deflating times as well as the low-noise operation make the recorder very comfortable for the patient
- Skin-friendly, easy-to-disinfect, synthetic cuff available in sizes S to XXL (latex-free)
- High-quality double tube system for significant reduction of motion artefacts
- Efficient energy management enables recordings up to 72 hours
- Night mode for a restful sleep
- Low-noise pump valve unit for patient-friendly measurement
- Adaptive algorithm for gentle measurement
- Robust recorder with high-performance components for a long product life cycle
- Fast data transfer from the recorder to the PC

ABPM SYSTEM CUSTO SCREEN 300

Make : custo med GmbH - Germany

Custo screen 300 is the first ABPM recorder worldwide that has been successfully validated according to stringent requirements of the ESH-IP-2010 protocol

HOLTER ECG AND ABPM CUSTO HOLTER ABPM

Make : custo med GmbH - Germany

Features

- Combination of custo screen 300/310 and custo guard holter
- Holter device custo guard holter:
- 3-channel lead without any cables
- Up to 72 hours recording time
- Pacemaker detection
- Easy placement due to snap fasteners
- Ergonomic shape and adhesive on the whole surface, for extraordinary recording quality
- Perfect for Holter ECG thanks to particular material properties
- ABPM recorder custo screen 300/310:
- Extremely robust recorder for long product life cycle
- Validated according to ESH-IP 2010
- Measuring the central blood pressure with custo screen 310

Synchronous recording of Holter and ABPM: The combination of custo screen 300/310 and custo guard holter is the perfect solution for simultaneous recording of Holter and ABPM

STRESS ECG TEST SYSTEM

Custo cardio 300 & Custo cardio 400 are the perfect solution for stress test ECG or cardiopulmonary exercise tests on the treadmill or Ergometer.

Features

- Automatic 10-second ECG
- Countdown can be visualised
- Check of electrode quality at a glance
- Start/Stop button on the device and on the PC
- Available as USB and BT version
- Maximum flexibility due to exchangeable patient cables and workstations
- Approx. 10 hours battery runtime
- Mobile use on all PCs (USB, BT/WiFi)
- Complete remote control is possible
- Easy and fast disinfection

CARDIAC REHABILITATION

Features

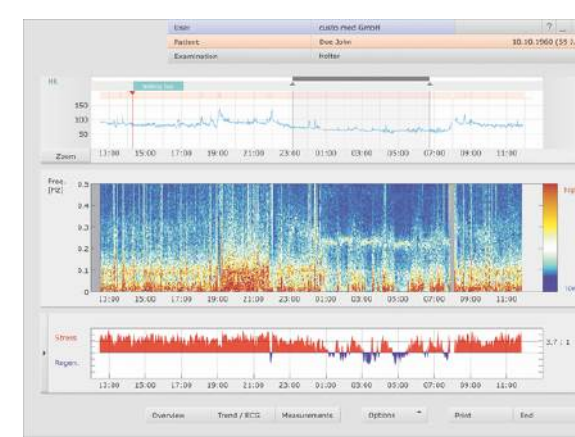

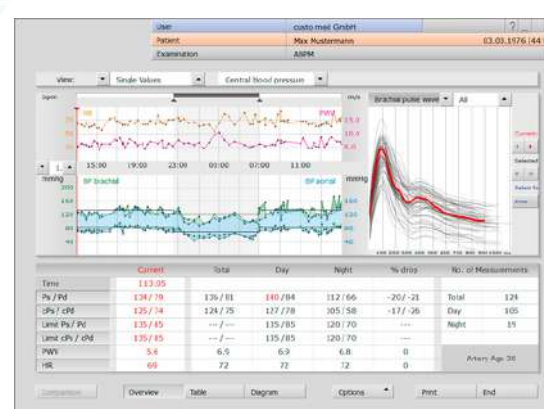

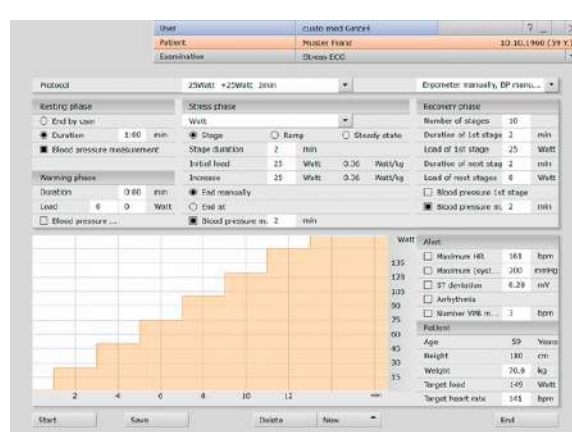

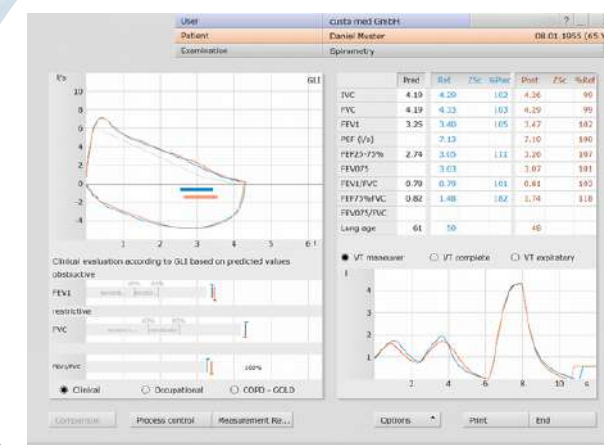

- Seamless workflows via HL7, DICOM and GDT
- Clear, paperless flows for all examinations
- Flexible, manufacturer-independent device concept
- Fully synchronised rehab workflows, optionally in WiFi infrastructure
- Modular concept with transparent licence model
- Safe investment: manufacturer-independent rehab management and integration of legacy system
- Subsequent HIS integration is possible at any time

To perform an effective rehab, you need a perfect ECG, various training devices and good software. With these three Customised “ingredients” and the patient, a complete cardiac rehab is possible.

CUSTO DIAGNOSTIC SOFTWARE

- Resting ECG
- Stress ECG
- Holter ECG
- ABPM
- Spirometry

SCREENING AUDIOMETER MODEL 116

Make : Amplivox - UK

Model 116 is an essential tool for completing hearing tests within schools, primary care and GP surgeries.

amplivox

Features

- Model 116 has a clear display panel and dedicated soft key layout
- Automatic threshold results saving significantly reduces operator test times
- Increases attention of the test subject for more accurate results
- At only 720g (1.58lbs), the lightweight and robust design of the Model 116 is perfect for healthcare professionals who need to travel.
- It also comes supplied with a custom carry case and all standard accessories
- Compact, lightweight, and portable
- Extended frequency range: 125 – 8000Hz
- Attenuation range: -10 – 100 dBHL
- Automatic threshold saving
- Pure, pulsed and warble tones.
- PC Software included.
- Intuitive and ergonomic design
- Mains and optional battery power

amplivox

Features

- Manual and automatic screening
- Compact, lightweight and portable
- Extended frequency range: 125 – 8000Hz
- Attenuation range: -10 – 100 dBHL
- User defined test routines
- Automatic threshold saving
- PC Software included
- Intuitive and ergonomic design
- Designed with the operator in mind, the Model 170 has a clear display panel
- Dedicated soft key layout
- At only 720g (1.52lbs), the lightweight and robust design of the Model 170 benefits any hearing care
- Results can be manually recorded, printed with the optional portable printer, saved in internal memory and or transferred to a PC application

SCREENING AUDIOMETER MODEL 170

Make : Amplivox - UK

Model 170 is the preferred tool of choice for hearing care professionals who complete hearing tests within schools, primary care, GP surgeries and industry

amplivox

DIAGNOSTIC AUDIOMETERS MODEL 270+ Make : Amplivox - UK

Features

- Two-channel audiometer
- Tone audiometry (AC, BC, pure tone, warble tone, pulsed tone)
- Narrowband and speech weighted masking
- Automatic AC and BC testing including automatic masking
- Speech audiometry (recorded and live)
- Masking assistant
- Free field functionality
- Special tests: ABLB, Stenger, SISI, Tone decay, HLS, MHA
- Amplisuite software and NOAH modules included
- With the inclusion of an internal memory function, test results can be printed immediately
- Saved for future processing using the supplied Amplisuite software.

A powerful two-channel diagnostic audiometer with enhanced technology for more accurate testing and reduced consultation times.

TYMPANOMETERS OTOWAVE 102-1 & 102-4 Make : custo med GmbH - Germany

amplivox

Features

- Fast and accurate middle ear measurements
- Intuitive and ergonomic design
- Large LCD graphics display
- Programmable ipsilateral reflex tests
- Optional portable printer and PC interface
- Multiple language options
- Internal memory
- PC connectivity to Noah applications with optional iRDA port
- Compact, lightweight and portable

Otowave 102 can help to reduce consultation times, making it the ideal choice for many audiology, ENT and hearing healthcare professionals.

TYMPANOMETERS OTOWAVE 202 & 202-H

Make : Amplivox - UK

Otowave 202 and 202-H offer comprehensive testing capabilities, ensuring flexibility to meet various testing needs.

amplivox

Features

- Live display
- Enhanced Ipsilateral and contralateral reflex frequencies (0.5, 1, 2 and 4kHz)
- Enhanced mode reflex test
- Auto pass/refer evaluation
- Fully customisable test protocol
- User selectable measurement speeds
- Internal memory, connection to portable printer and/or PC
- The Otowave 202 provides 226Hz probe tone impedance measurements
- 202-H features a more comprehensive range of diagnostic test functions including user defined 226Hz and 1000Hz probe tone impedance measurements.
- The ideal choice for audiology, ENT and hearing care professionals who require a portable tympanometer for both mobile and clinical test settings.

amplivox

Features

- Graphic LCD display
- Live tymp display - measurements shown in real time
- Ipsilateral and contralateral reflex frequencies (0.5, 1, 2 & 4kHz)
- Auto pass/refer evaluation (ear canal volume)
- Optimised, user-selectable measurement speeds
- Intuitive handheld screening tympanometers for reliable and accurate middle ear measurements.
- Fast and accurate middle ear measurements Intuitive and ergonomic design
- Programmable ipsilateral reflex tests
- Optional portable printer and PC interface
- Multiple language options
- Internal memory PC connectivity to Noah applications with optional iRDA port
- Compact, lightweight and portable

TYMPANOMETERS OTOWAVE 302 & 302+ Make : Amplivox - UK

The Otowave 302 includes the perfect test array to assess all ages and identify the most common middle ear pathologies. The Otowave 302+ offers quick and accessible test settings with the additional feature

amplivox

VISION TESTERS - VISIOLITE MASTER

Make : Amplivox - UK

Features

- PC operated or remote-controlled
- Customisable patient instructions
- Time-saving user defined test routines
- Horizontal and vertical peripheral field tests
- EMR connectivity
- Glare sensitivity and resistance (Visiolite Master GT only)
- The Visiolite Master and Visiolite Master GT provide significant improvements in both workflow and time management.
- A unique feature of the Visiolite Master is that it enables user defined test parameters to be selected, as well as configuration of the test sequence parameters to suit the needs of the programme
- An easily adjustable height feature and a dual lens system

PC operated vision testers designed to provide fast and accurate vision assessments with fully customisable test routines and automated data management.

VISION TESTERS - TITMUS V4

Make : custo med GmbH - Germany

amplivox

Features

- Compact and portable
- Ergonomic design
- Head sensor for accurate head positioning
- Remote control panel
- True colour testing
- Comprehensive range of test parameters
- No calibration required
- Ideal for industrial and DSE screening needs
- The Titmus V4 provides a comprehensive range of eye tests
- Can minimise consultation times, improve workflows, help with record keeping, and deliver comprehensive patient results.

A precision-built vision tester designed to provide accurate and reliable vision screening for occupational health professionals.

AUDIOLOGY BOOTHS

Make : Amplivox - UK

amplivox

The 250s and 350s audiology booths allow for accurate, safe and reliable hearing test assessments through the attenuation of background sound, complying with the standard ISO 8253-1 for audiometric test methods to ensure the best testing results.

250S

350S

Features

- Supplied pre-assembled or as a self-assembly kit
- Folding shelf and integral jack panel
- Silenced ventilation system and lighting
- Fitted with castors for complete mobility
- Large double-glazed acoustic window
- Built-in patient's seat
- Complies with BS EN ISO 8253-1

Features

- Supplied as a self-assembly kit
- Integral jack panel
- Silenced ventilation system and lighting
- Fitted with castors for complete mobility
- Large double-glazed acoustic window
- Left hand or right hand door configuration
- Complies with BS EN ISO 8253-1

SMART PFT USB – PC BASED MA801

Make: Charder Electronic Co - Taiwan

Features

- Body Composition Analysis: Non-invasive Bioelectrical Impedance Analysis.
- Muscle-Fat Analysis: Breakdown of skeletal muscle and body fat.
- Obesity Analysis: Percent Body Fat, Waist-Hip Ratio, and Visceral Fat indicators.
- Total & Segmental Analysis: Measurements of muscle and fat distribution.
- BIVA: Assesses cellular hydration and nutritional status.
- Phase Angle: Key health indicator, especially for illness and aging.
- Muscle Quality: Evaluates muscle strength, warning for fall risk.
- Body Fat Percentiles: Contextual comparisons based on age, gender, and ethnicity.
- Edema Index: Indicates fluid balance abnormalities.
- Research Information: Comprehensive parameters for research on malnutrition, obesity, and sarcopenia.

The MA801 Body Composition Analyzer offers precise insights into body composition, aiding medical professionals with patient tracking and diagnostics, backed by extensive research.

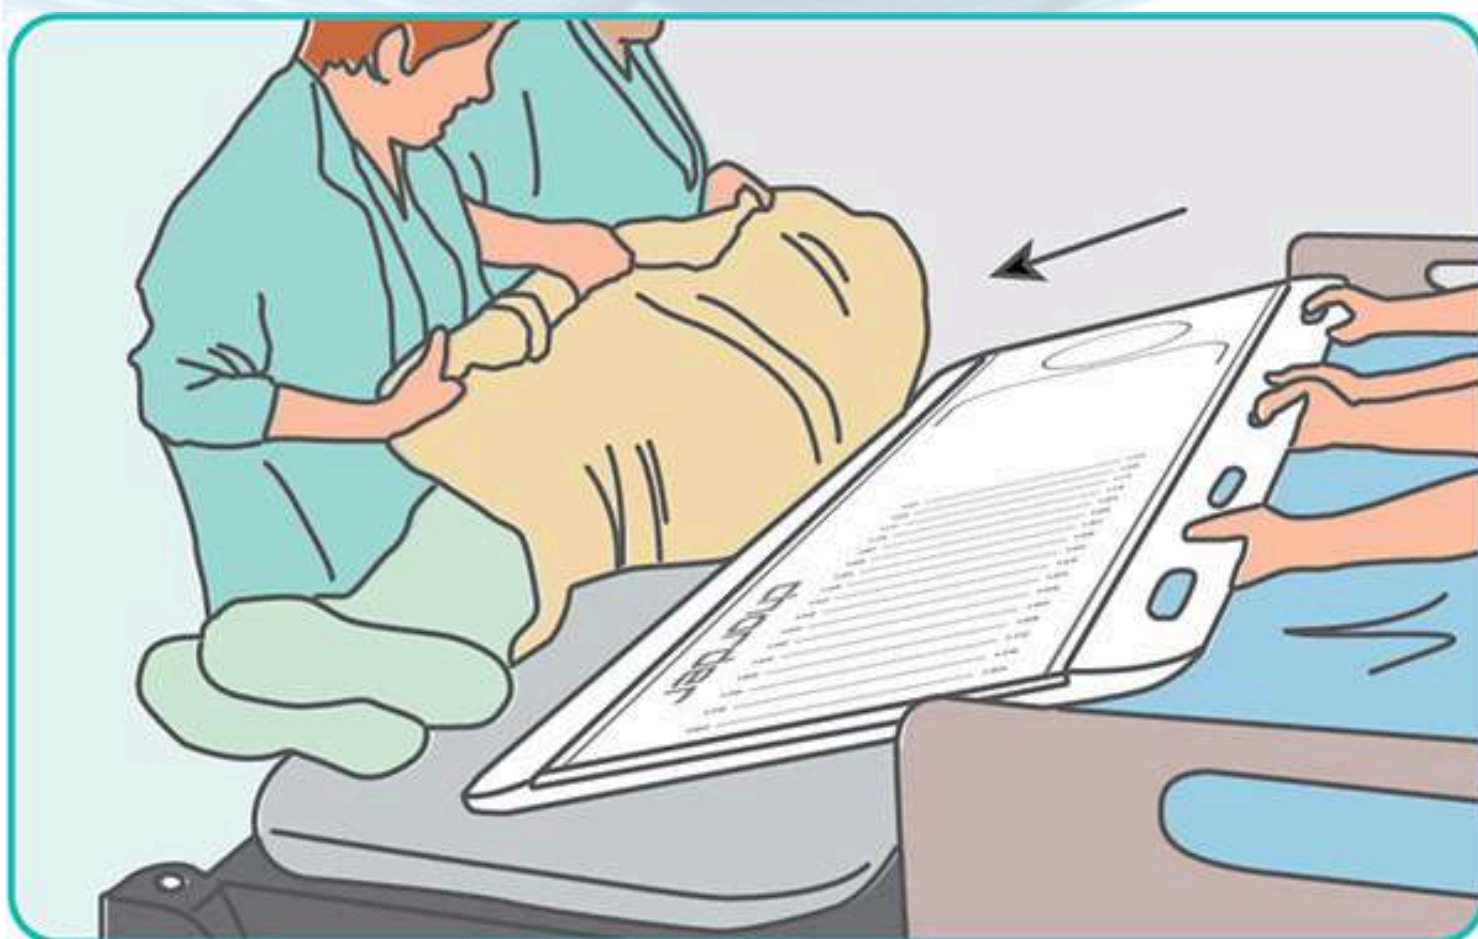

MEDICAL SCALES PATIENT TRANSFER SCALE

Make: Medical Equipment Europe GmbH -Germany

Features

- Class III Approved
- EU Medical Device Directive Approved
- 250 kg Maximum Capacity, 500g graduation
- 50 hours of continuous use, rechargeable battery
- Handles for wall-mounting and easier usage

The Patient Transfer Scale ensures faster, safer, and easier weight measurement with a backlit display, skin-safe mat, and convenient carry handles.
